mashup!

How your money helps

£50

provides expert support from our helpline to five people

£100

helps two people to meet experts at our annual Members' Day

£250

provides an information-packed guide-book to 125 people

About us

Ankylosing spondylitis (axial spondyloarthritis) (AS) is a painful, incurable inflammatory arthritis, mainly affecting the spine. It affects around 200,000 people in the UK, and symptoms tend to start between the ages of 18-24.

The National Ankylosing Spondylitis Society (NASS) is the only charity in the UK dedicated to providing life-changing support to anyone affected by AS.
